

EQUIP YOUR CONVEYING LINE

For Efficiency

Need some extra conveying equipment to complement your awesome rotary valve? Here's how we can help equip different parts of your conveying line.

PRESSURE BLOWER PACKAGE FOR CONVEYING SYSTEMS

Add high-efficiency pressure conveying capabilities to your dry bulk material handling operations.

FEATURES

- Powerful TEFC motor
- Energy-efficient
- Comes fully assembled
- Sized to your requirements
- Quiet and simple to maintain

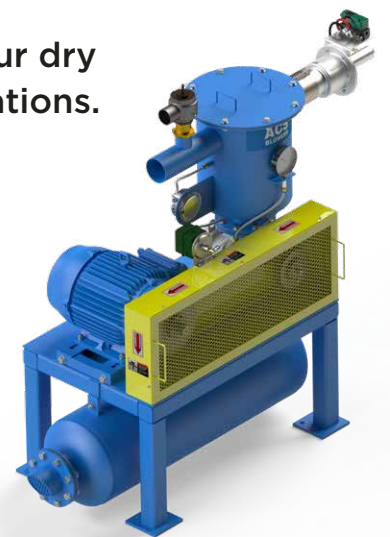

VACUUM BLOWER PACKAGE FOR CONVEYING SYSTEMS

Add high-efficiency vacuum conveying capabilities to your dry bulk material handling operations.

FEATURES

- Powerful TEFC motor
- Energy-efficient
- Comes fully assembled
- Sized to your requirements
- Quiet and simple to maintain

TYPE-2 BULK BAG DISCHARGING SYSTEM

Accommodate most bottom spout bulk bags with a welded steel tube frame.

FEATURES

- Rubber dust membrane
- Heavy-duty steel lifting frame
- Provides dust-free seal
- Many options available

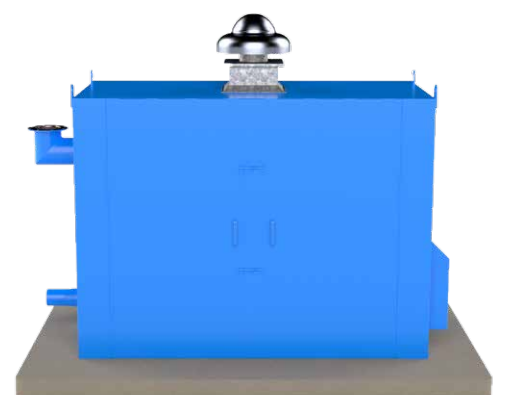

VACUUM/PRESSURE BLOWER SOUND ENCLOSURE

Reduce noise levels with a sound enclosure for your pressure or vacuum blower package.

FEATURES

- Noise reduced to <80 dBA
- Ventilation louvers
- Double-sided access doors
- Lined with acoustic foam

SCREW CONVEYOR

Convey efficiently with CEMA-type screw conveyors fabricated by ACS Valves.

FEATURES

- Multiple screw sizes available
- Standard and custom lengths
- Different trough and screw types
- Conforms to CEMA standards
- NFPA-compliant designs available
